

Time Stream
Create unlimited snapshots of VMs locally with an RPO in minutes

Synchronous Replication
Enable continuous availability across sites during planned maintenance or disasters by synchronously replicating data

Cloud Connect
Enable hybrid clouds by seamlessly backing up VMs to public cloud on a user-defined schedule

Async Remote Replication
Asynchronously replicate VMs across sites based on configurable schedules

Centralized Management using Prism

??? Did you know? ???

Nutanix provides

- ✓ Shared nothing architecture with no single point of failure
- ✓ Data and meta-data redundancy
- ✓ Data integrity checks during reads
- ✓ Silent error detection for data consistency
- ✓ Automatic isolation and recovery during disk failures
- ✓ Self-service restore of individual files from VMs

When Do I use what?

RPO	RTO	Nutanix Feature	
Minutes	Minutes	Time Stream	Minor Incidents
Hours	Hours	Cloud Connect	
Minutes	Minutes	Remote Replication	Major Incidents
Zero	Minutes	Metro Availability	

HARDWARE PLATFORMS

NX-1000

Affordable solution for remote/branch offices and retail locations

NX-3000

Perfect for VDI and server virtualization workloads

NX-6000

Targeting apps with heavy storage requirements with 3x more capacity per node

NX-7000

Ideal for VDI deployments with graphics-intensive desktops

NX-8000

Tailored for mission critical workloads such as Microsoft SQL Server, Exchange, SharePoint, SAP, and Oracle

NX-9000

All flash solution for mission critical workloads requiring consistent low latency across entire dataset
